

E-JASS Development - Release Notes 01/12/2016

Current Version - 0.99.13 (Released)

- Improvements to the general layout and appearance of the participant interface
- Added the ability for participants to switch between award levels that they are allowed to do
- Setting the time taken for an activity is more user friendly and now uses hours and minutes - Bug fixes and improvements to the data import tool including:
 - Header rows have more allowable errors (e.g. case is now ignored)
 - Single user errors no longer stop the rest of the import from being completed
- Improvements to the School Admin interface
- General layout and appearance
- Classes can now be archived to allow for better organisation and management of current classes
- JASS Admin interface
- A tool allowing users to be moved from one school to another is now available
